EDUCATION

Samrat Ashok Technological Institute Vidisha (M.P.) India

Bachelor of Technology in Artificial Intelligence and Data Science

September 2023 – June 2027

GPA: 8.10/10.0

EXPERIENCE

TRIDENT GROUPS

Field Data Collection Lead Robot Training

April 2026 – May 2026

Narmadapuram, India

- **Real-World Data Collection:** Operated the **Magic Hat** device (camera + voice sensor) to capture real-time worker motions on the factory floor, enabling robots to learn machine operation and handling tasks through observed human behaviour.
- **Robot Training & AI Dataset Pipeline:** Structured and labelled motion-capture datasets to train robotic systems, bridging raw field recordings into clean, annotated data ready for machine-learning pipelines used in industrial automation.
- **Large-Scale Data Sourcing:** Gained hands-on understanding of how platforms such as **Kaggle** and **Oracle** acquire, manage, and distribute large-scale real-world datasets for enterprise and research AI applications.

NEW VISION PVT. LTD.

Data Analytics Intern

February 2025 – March 2025

Bhopal, India

- **Python-Based Data Analysis:** Gained hands-on experience with core Python libraries – **NumPy** for numerical computations and array operations, **Pandas** for data cleaning, manipulation, and structured analysis.
- **Big Data Fundamentals & Data Cleaning:** Developed an understanding of how large-scale datasets are handled, preprocessed, and cleaned, including dealing with missing values, outliers, and unstructured data, as part of a broader overview of the **data science** pipeline in the digital era.

PROJECTS

AI POTHOLE DETECTION USING MACHINE LEARNING

Smart India Hackathon 2025 — [Project Link](#)

December 2025

- Built a real-time web platform using **YOLOv8**, **Python**, **OpenCV**, and **PyTorch** to detect potholes from images, videos, and webcam feeds with centroid-based tracking to eliminate duplicate detections.
- Integrated automated reporting with location and severity details, Google OAuth, an analytics dashboard, and email-based complaint routing to municipal authorities for real-time issue management.

HEALTH LOCK SYSTEM – BLOCKCHAIN-BASED MEDICAL DATA SECURITY

SUNHACKS-2025 – India's Largest Gen AI Hackathon, hosted by Sandip University in collaboration with Hack With India! — [Project Link](#)

August 2025

- Developed a secure health record management system for the medical department using **blockchain** technology to store and protect patient data with immutable, decentralized ledger entries.
- Implemented **end-to-end encryption**, ensuring only authorized personnel can access sensitive patient records, eliminating data tampering risks and ensuring compliance with medical data privacy standards.

TECHNICAL SKILLS

Programming languages: Python, C++, C, C#

Web Technologies: HTML, CSS, Bootstrap, Flask, streamlit

Libraries: Nltk, Numpy, Pandas, Matplotlib, OpenCV

Miscellaneous: MySQL, Github, Git, Canva, Figma

Computer Science fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Operating system, DBMS (SQL)

ACHIEVEMENTS

SIH: India's government's biggest national-level hackathon, Smart India Hackathon, winner at college level

NCC—National Cadet Corps: Attended the All India Thal Sainik Camp, IGC Raipur, twice, demonstrating consistent excellence in leadership, discipline, and teamwork at a national military training level.

Cummins Scholar: Selected among 32 out of 5,000+ students across the college for the prestigious **Cummins Scholarship**, covering overall college fees in recognition of academic excellence and outstanding merit.

POSITIONS OF RESPONSIBILITY

Entrepreneur Cell E-Cell S.A.T.I.: (Graphic Designing Lead)

2023 – Present

Designed all creatives for the National Entrepreneurship Challenge; secured **All-India Rank 19 at E-Summit 2025, IIT Bombay**.

Training and Placement Cell, S.A.T.I.: (technical lead)

2023 – Present

Spearheaded initiatives within the Training and Placement Cell, successfully coordinating placement drives.
